

Running Instructions

This document outlines the running steps of our Quax game.

Java Development Toolkit

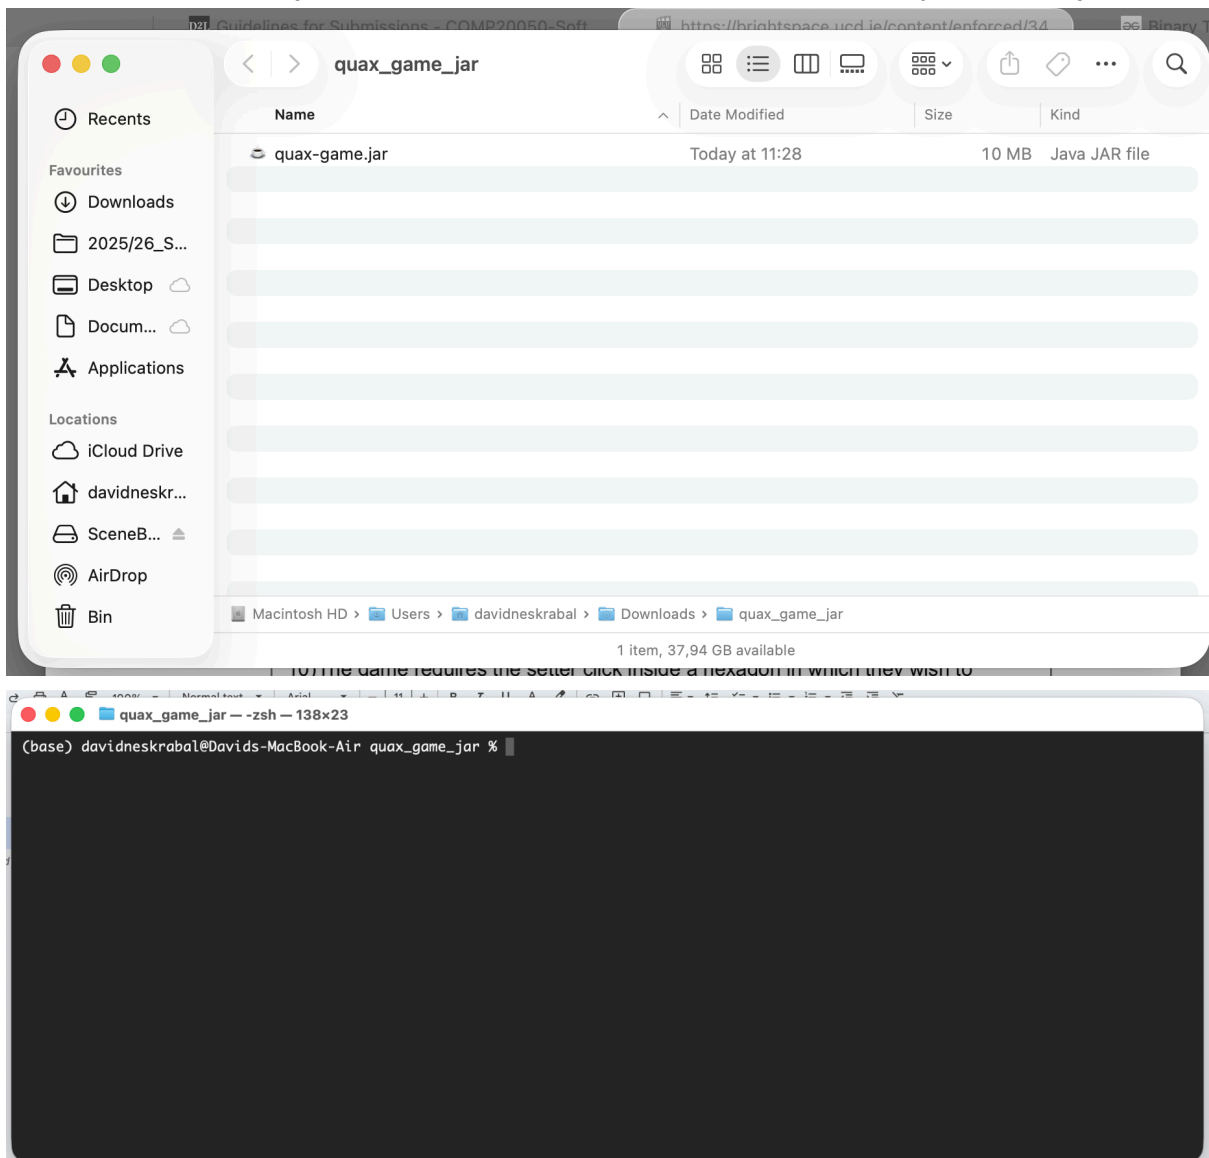

The JDK used is Oracle OpenJDK version 25.0.2

Launch Instructions

```
java --module-path <JDKPath>/javafx-sdk-25.0.2/lib \  
--add-modules javafx.controls,javafx.fxml \  
-jar quax-game.jar
```

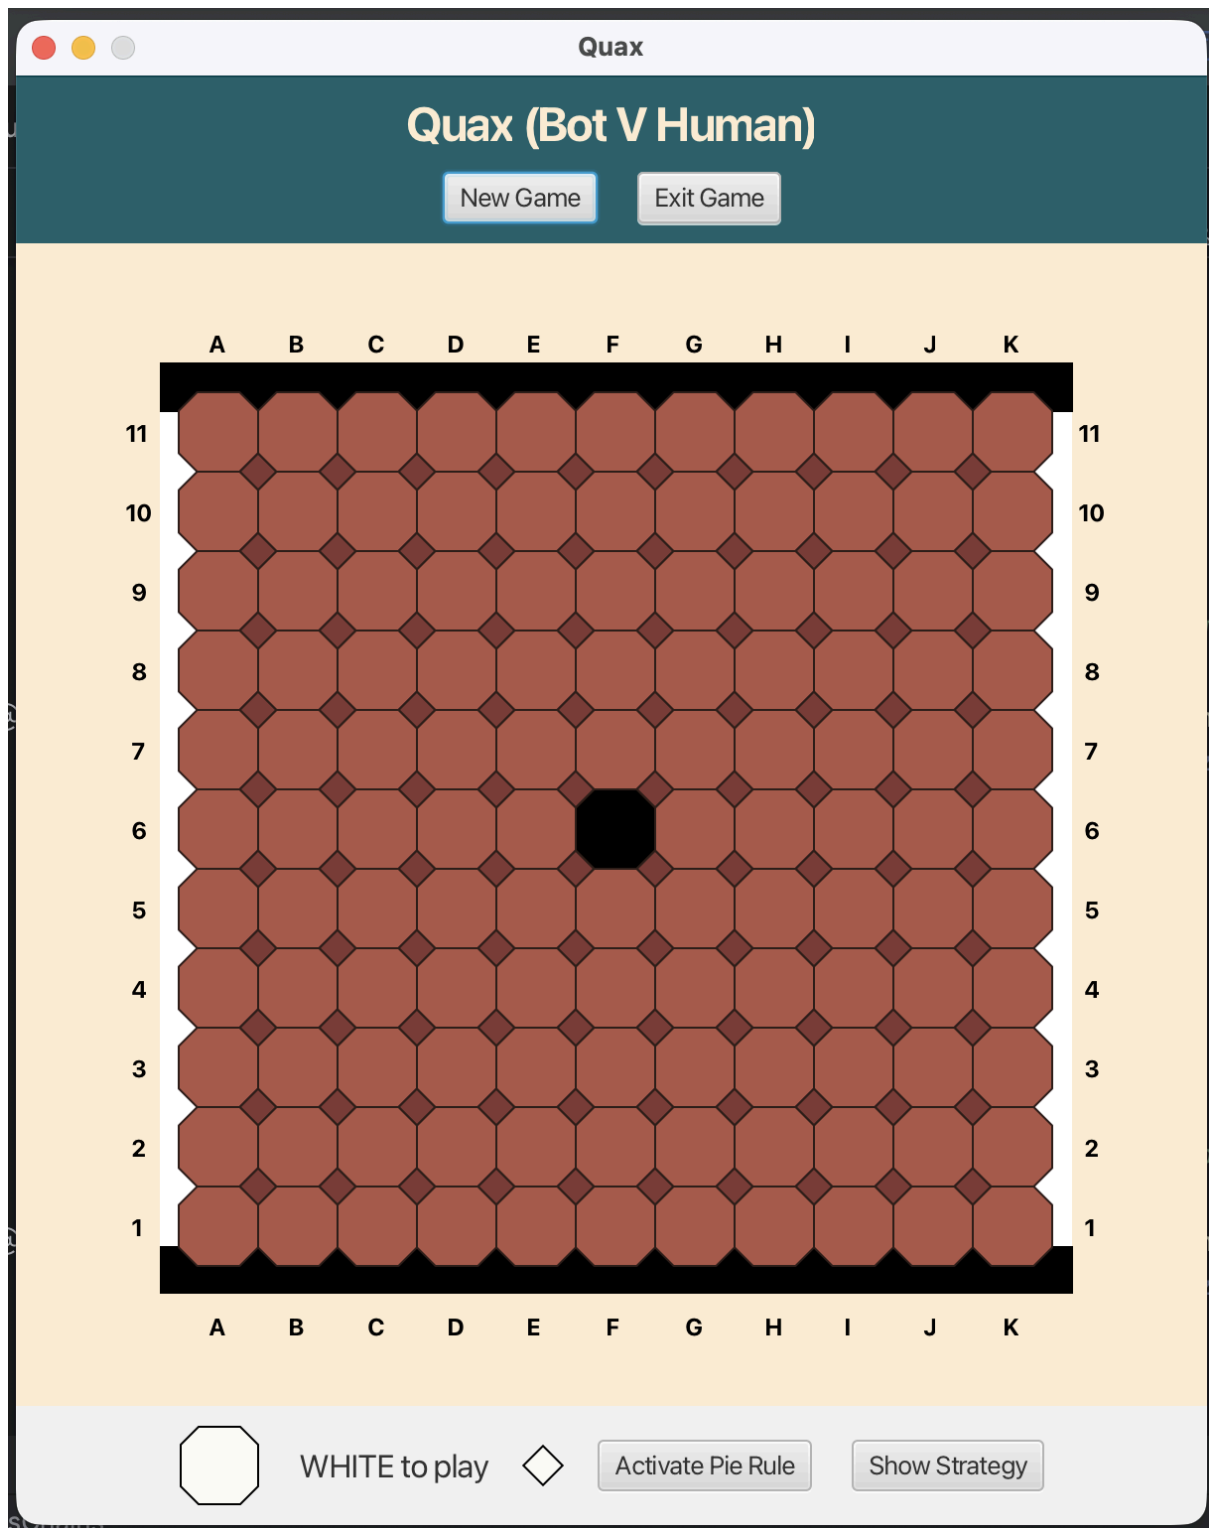

Note : <JDKPath> - path to the javafx-sdk-25.0.2/lib directory

Step 1 : download the jar file and then open the terminal at the directory where the jar file is

Step 2: run the command mentioned in launch instructions and the game will start running

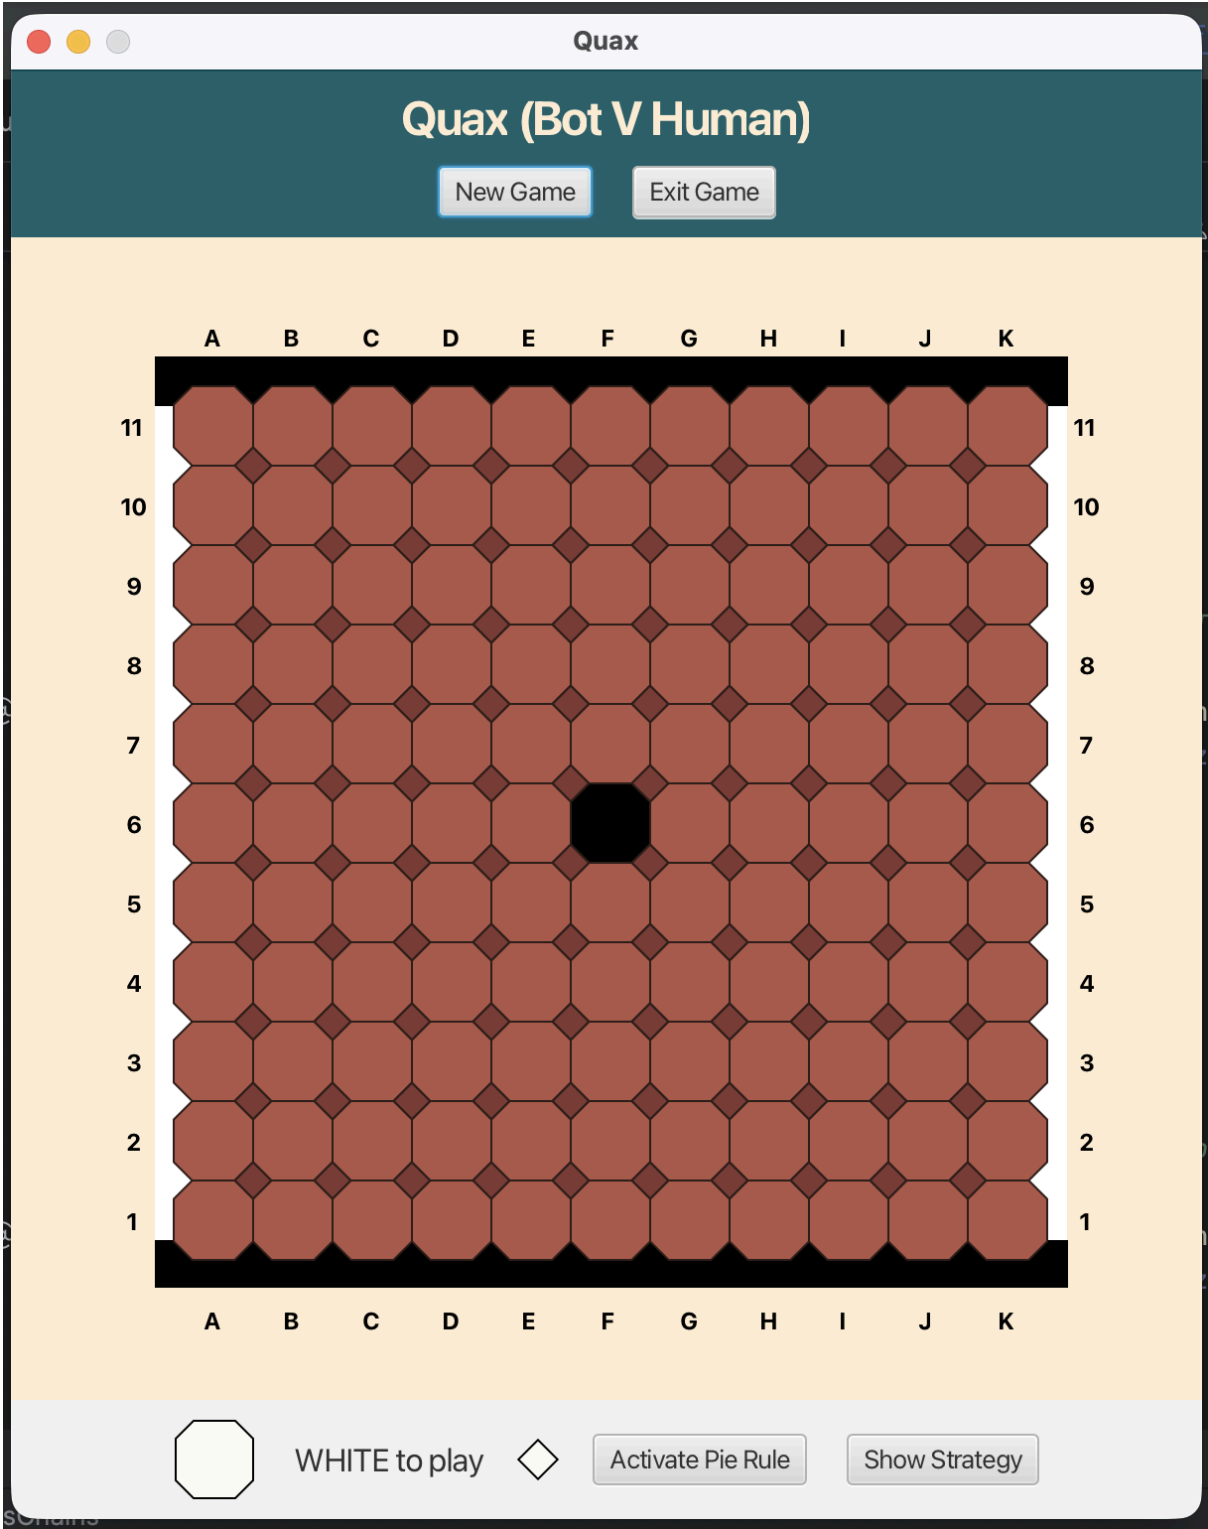

```
quax_game_jar --zsh — 138x23
(base) davidneskrabal@Davids-MacBook-Air quax_game_jar % java --module-path /Users/davidneskrabal/Downloads/javafx-sdk-25.0.2/lib \
--add-modules javafx.controls,javafx.fxml \
-jar quax-game.jar
```

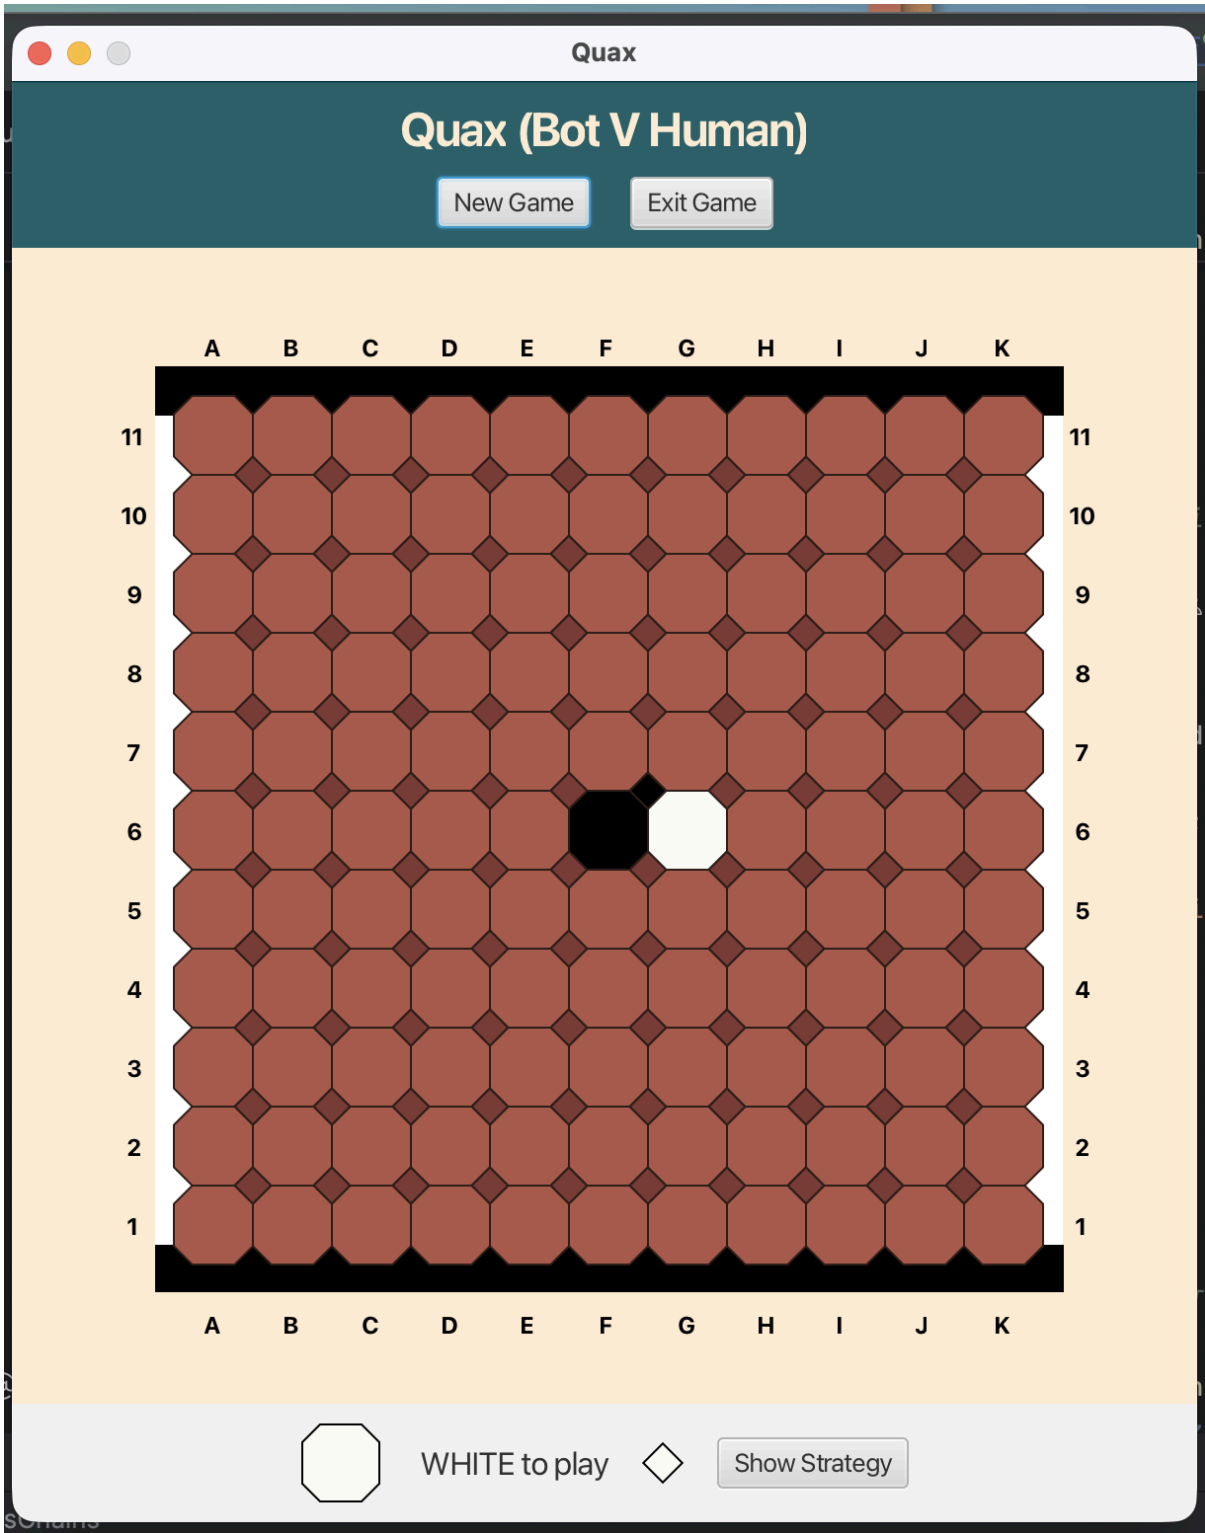

To exit - click 'exit game'.

Playing Instructions

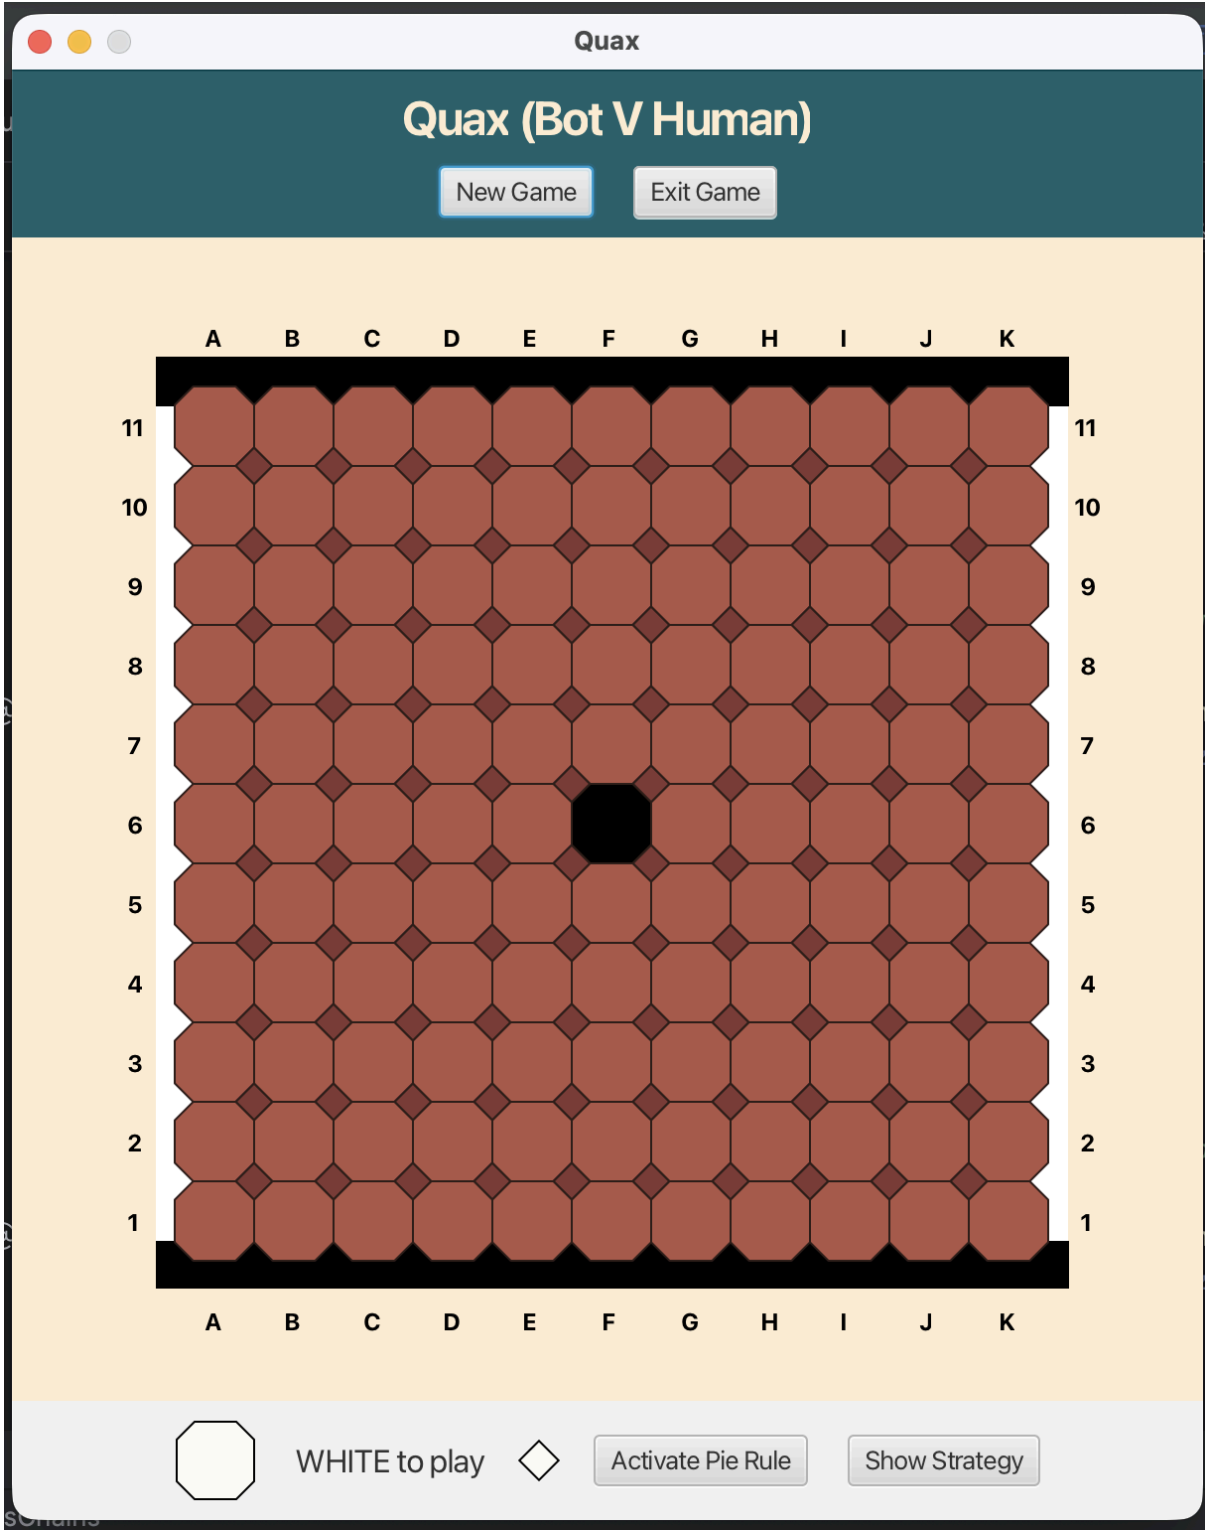

Step 1 : Launch the game using the instructions above

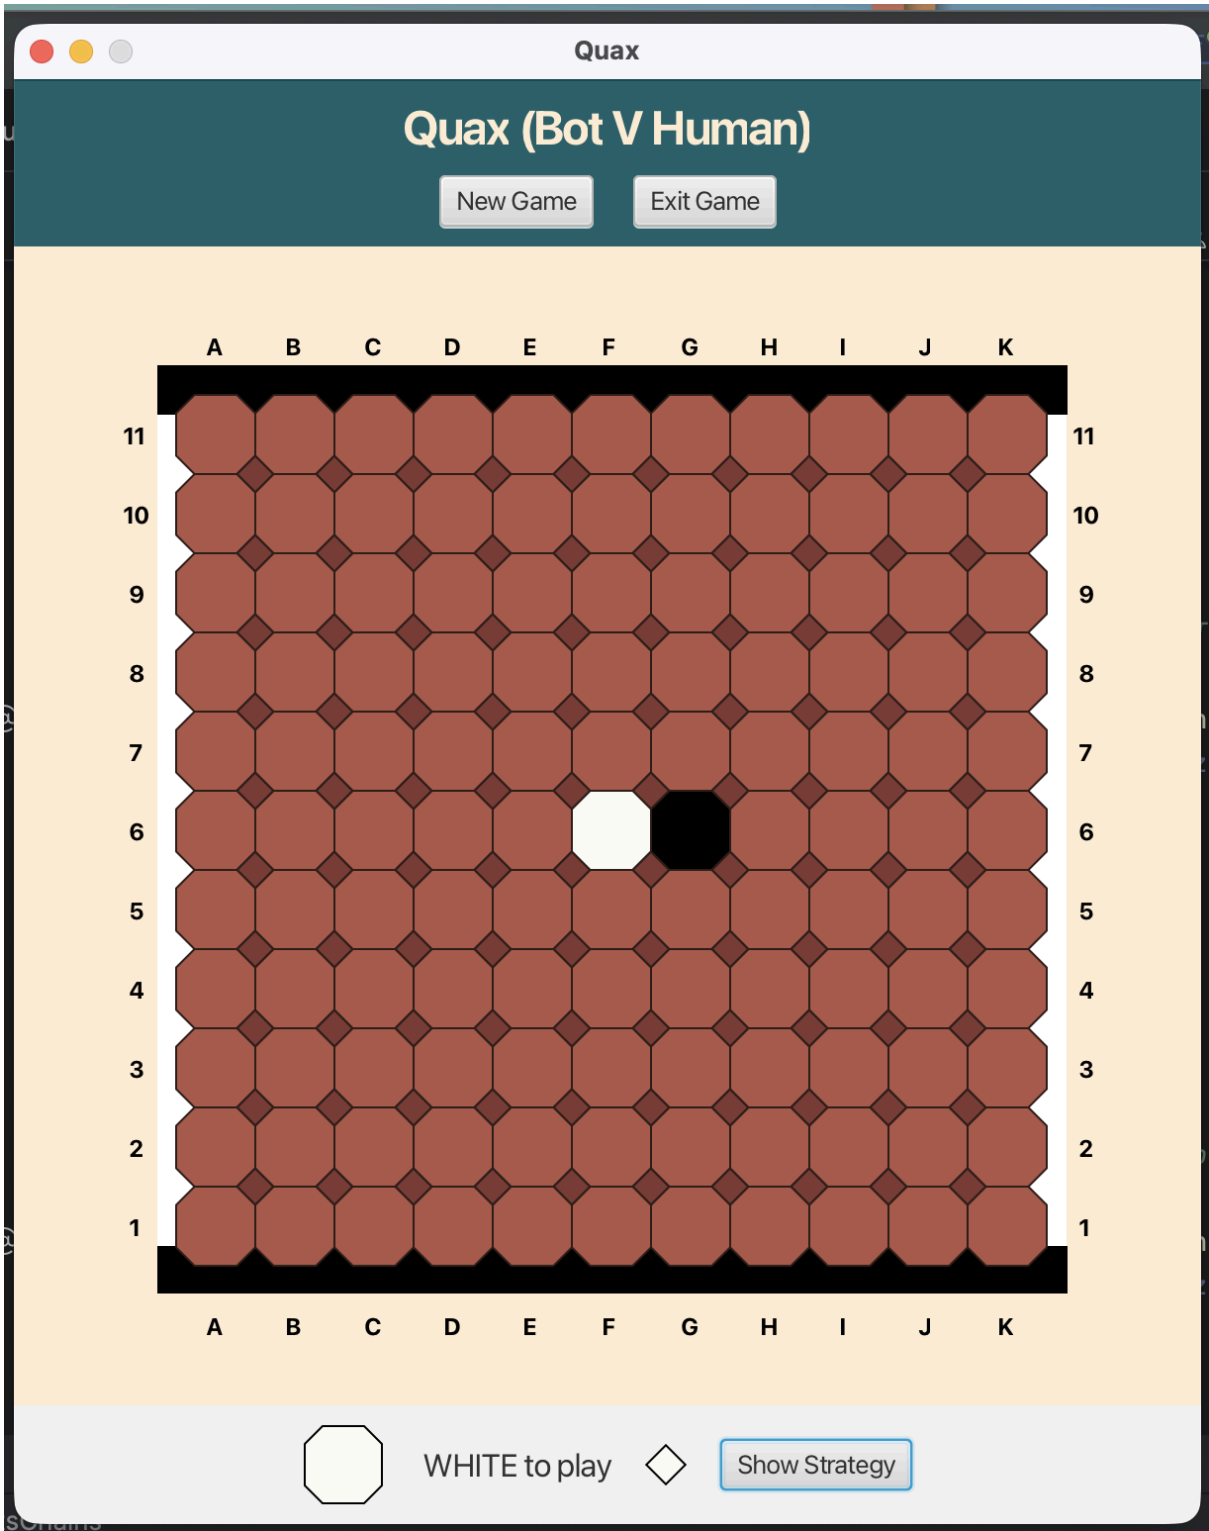

Step 2 : Click on a shape either octagon or rhombus to place a tile to begin the game

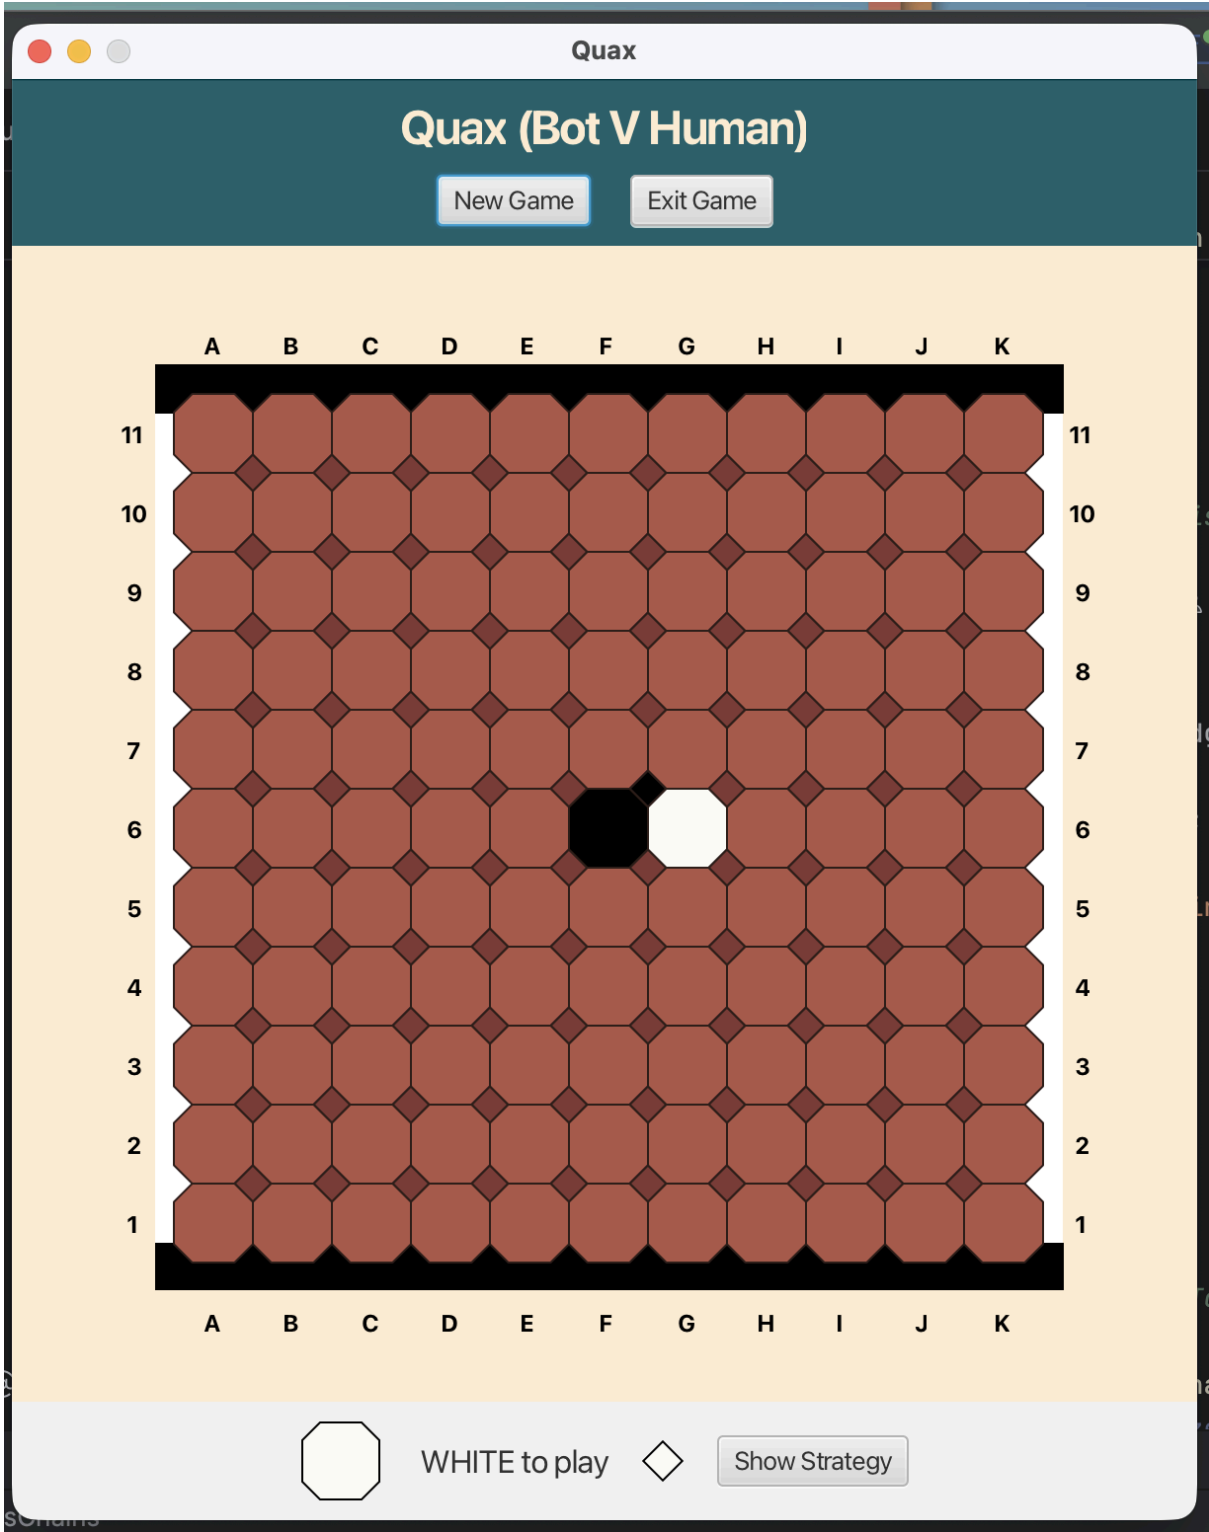

Step 3 : Player 2 has the option to activate the pie rule by clicking the ‘Activate Pie Rule’ button.

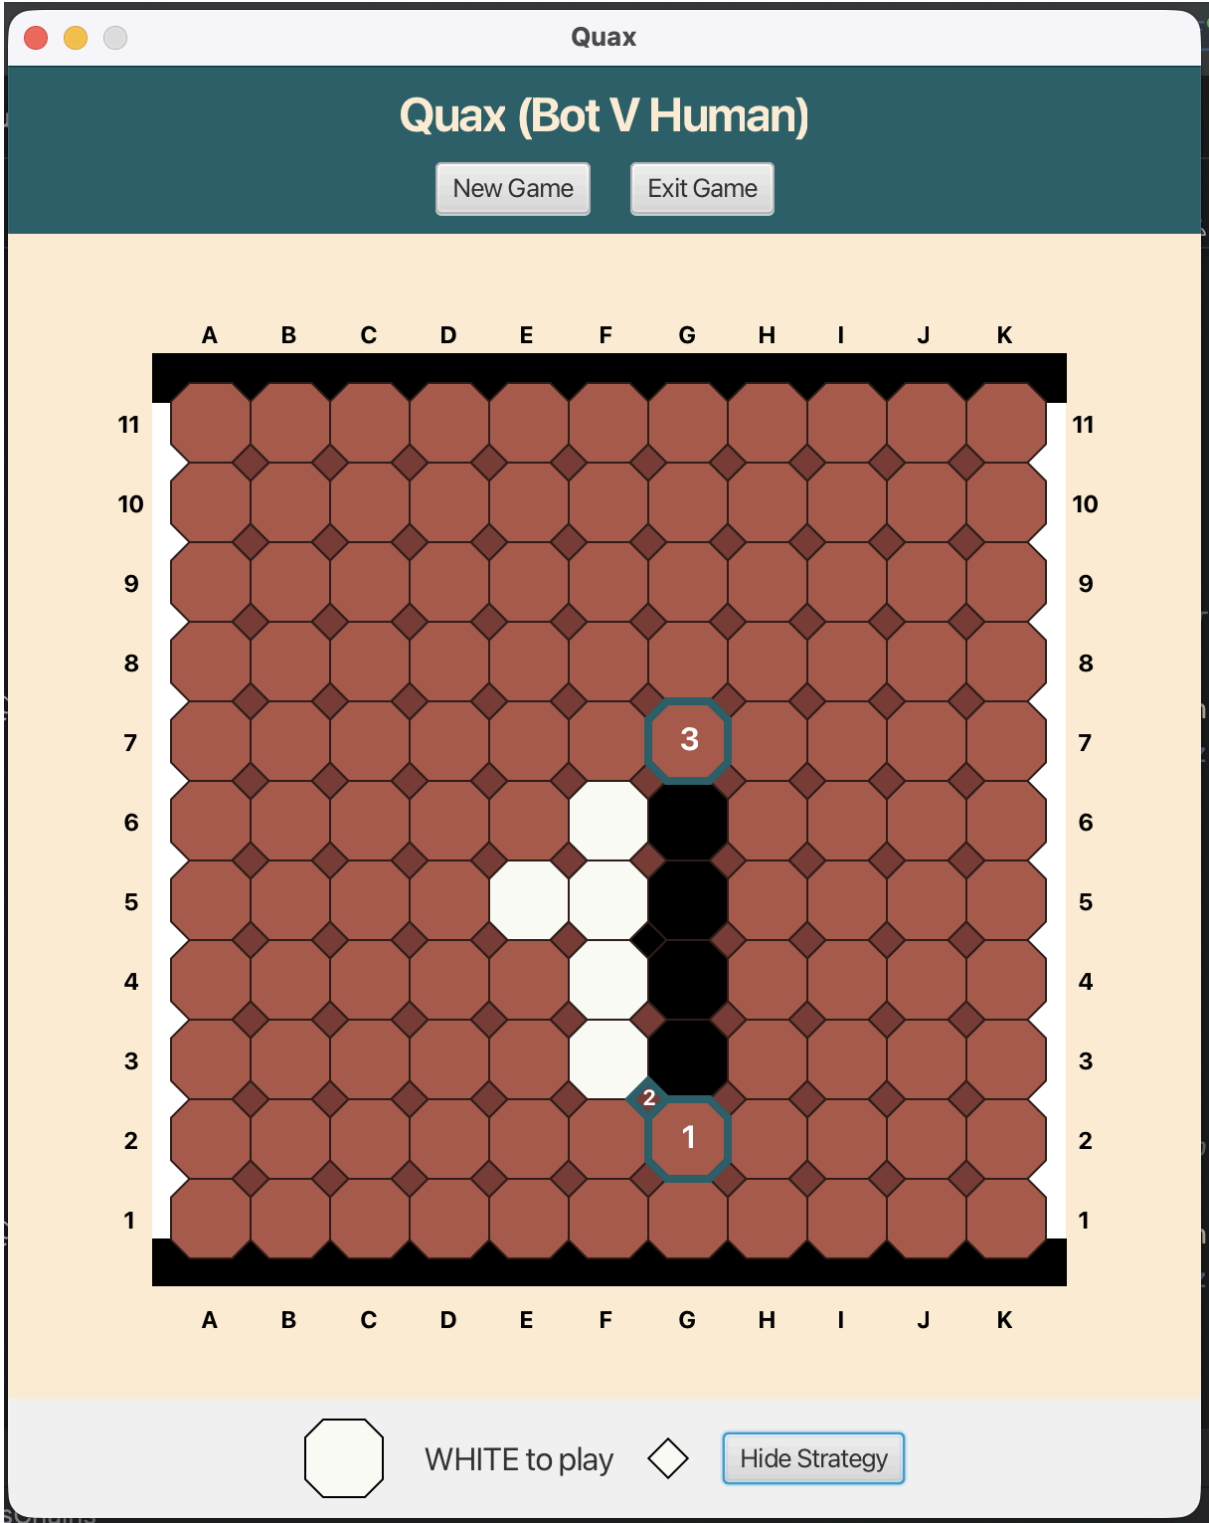

Step 4.1 : If Pie Rule is activated, The BLACK tiles change to WHITE.

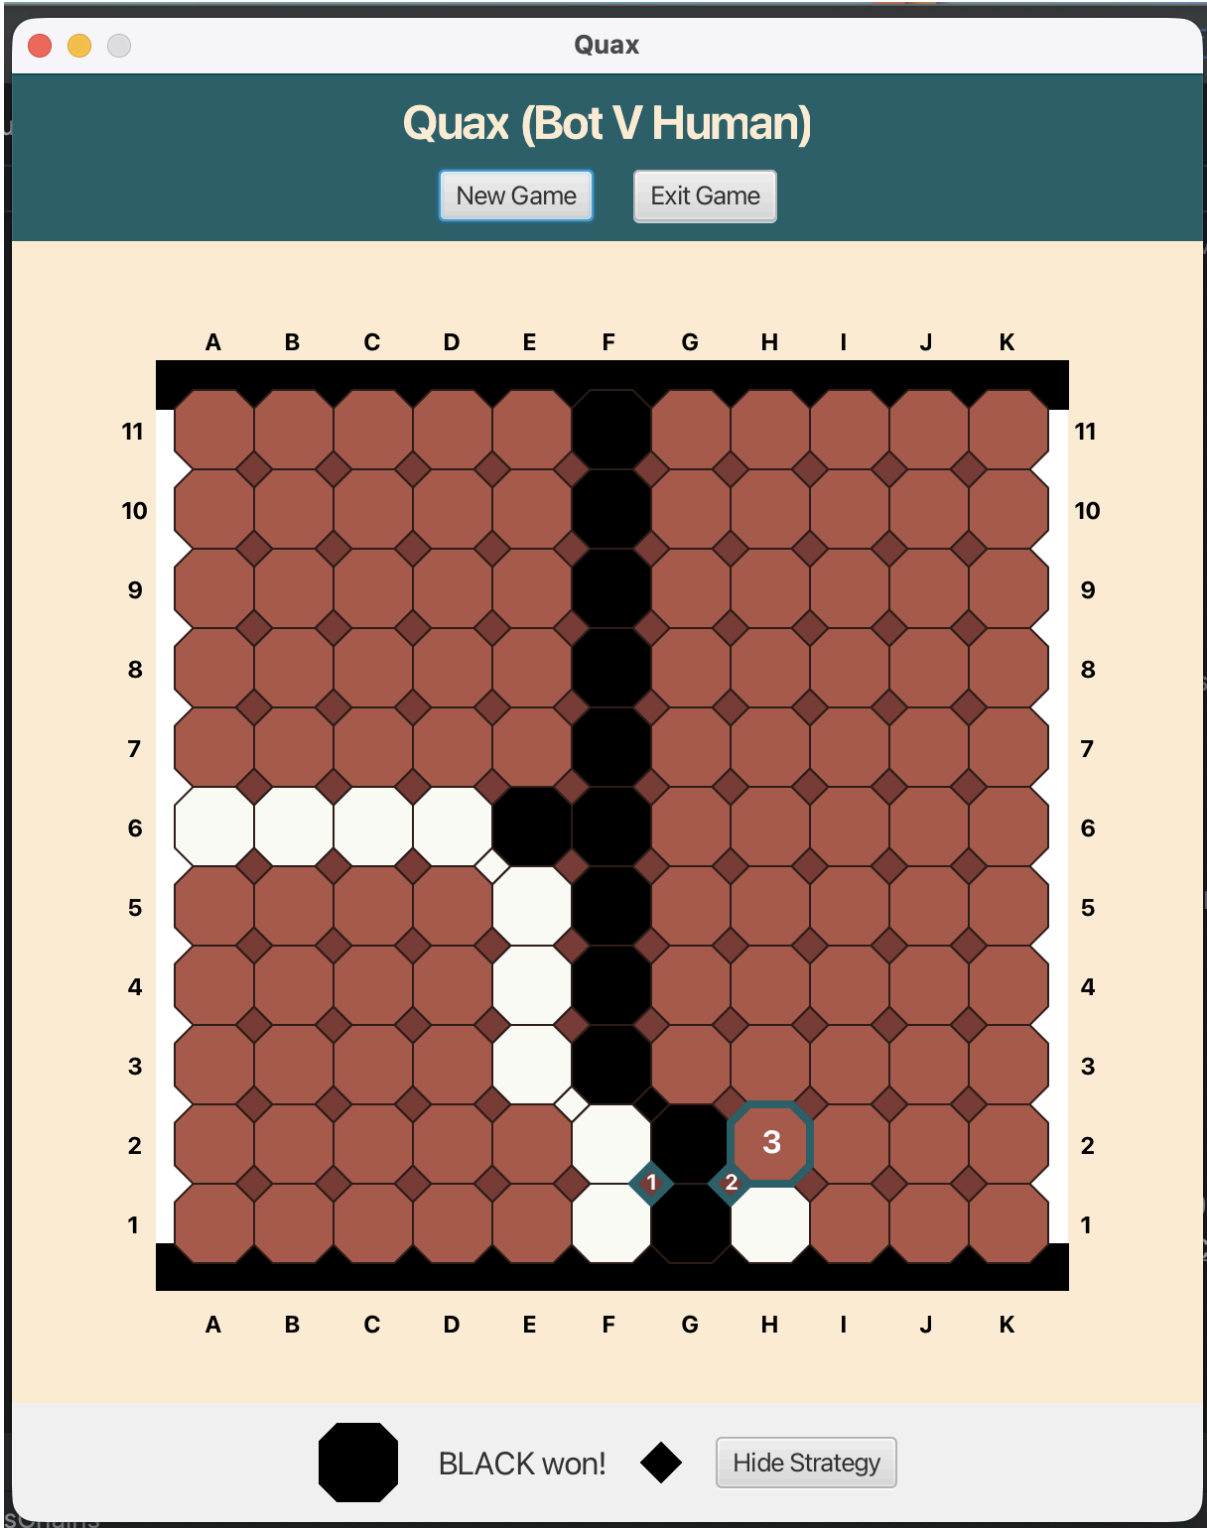

Step 4.2 : If Pie Rule is not activated, Player 2 places white stone and the game continues as normal.

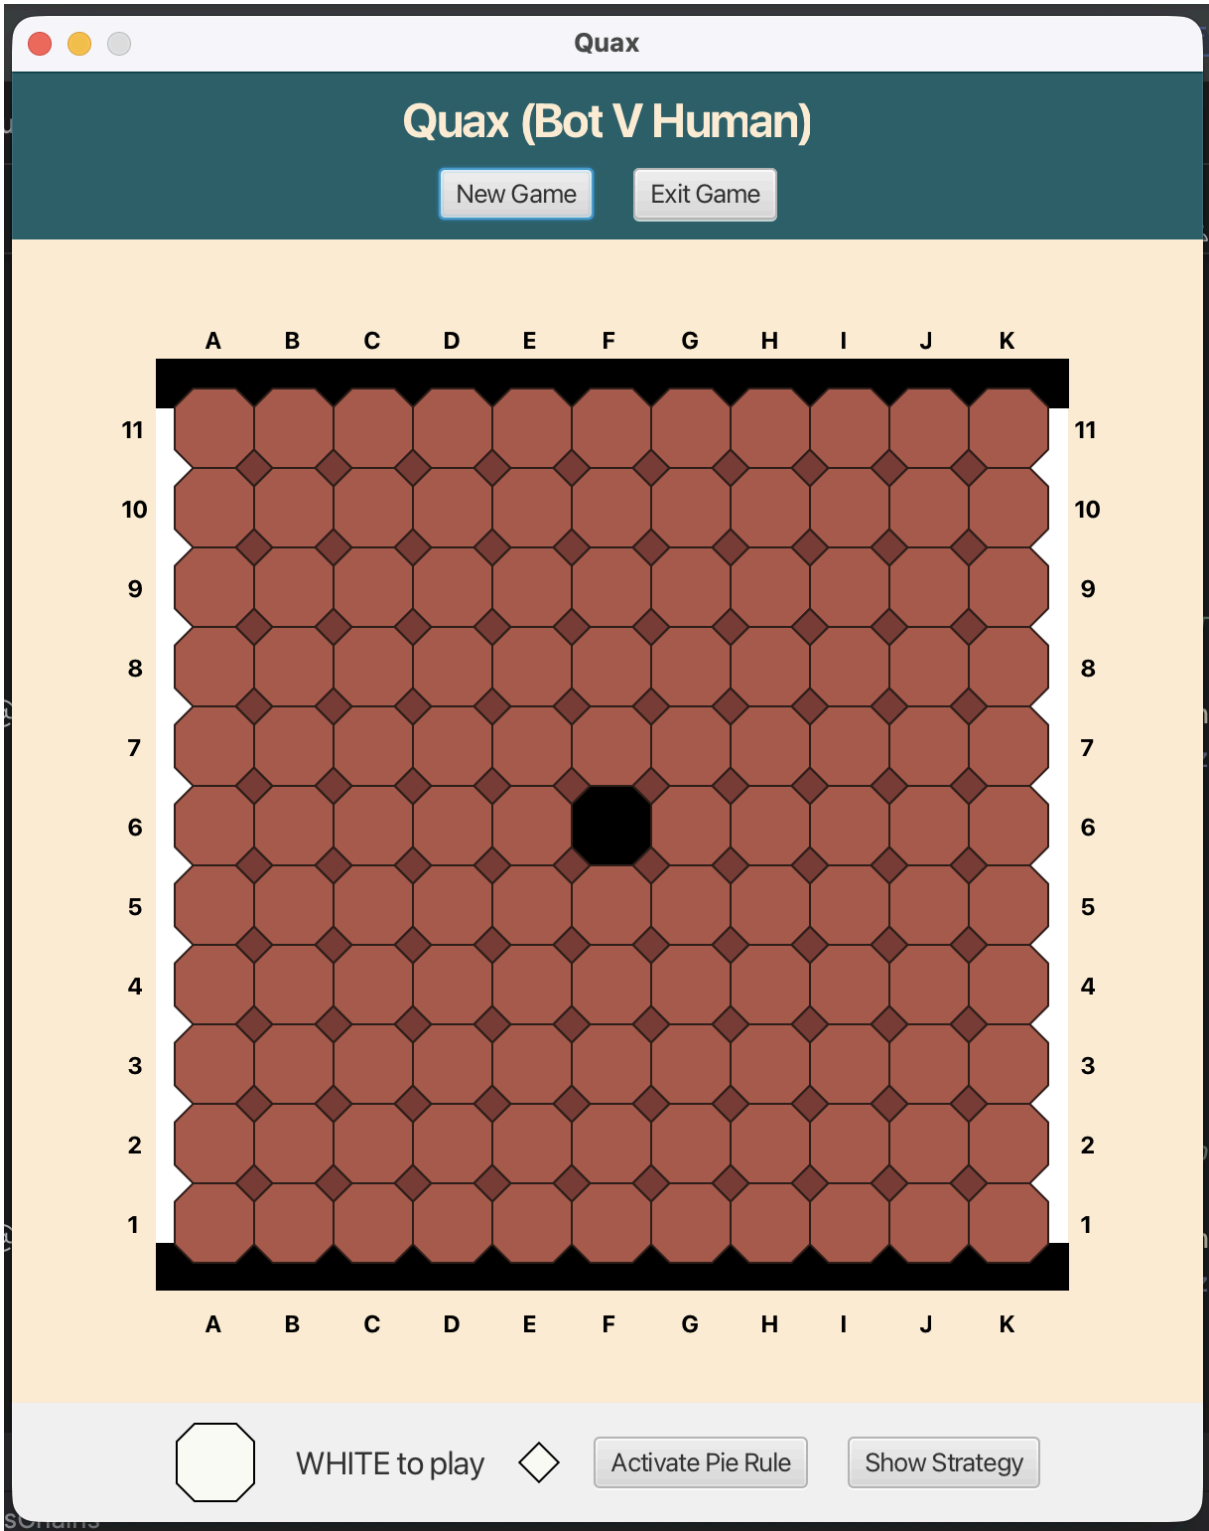

Step 4.3. To show the bot strategy click the button “Show Strategy” to hide it click button “Hide Strategy”

Step 5 : Keep placing stones until one player connects the edges with their colour. After that the game displays the player that won and the game stops.

Step 6 : To reset the game and play again hit the new game button

Step 7 : To exit the game, click the exit button.
